1. Open the Control Panel and choose "Network and Internet" from the Categories

2. Next, choose "Network an Sharing Center" from the Categories

 In the Network and Sharing Center under the section labeled "Change your networking settings" and choose "Set up a new connection or network"

4. Next, choose "Connect to the Internet" and click the "Next" button at the bottom.

Choose a connection option	
Connect to the Internet Set up a wireless, broadband, or dial-up connection to the Int	ernet
Set up a new network Configure a new router or access point.	
Manually connect to a wireless network Connect to a hidden network or create a new wireless profile.	
Connect to a workplace Set up a dial-up or VPN connection to your workplace.	
Set up a dial-up connection Connect to the Internet using a dial-up connection.	

5. Next, choose "Broadband (PPPoE)

6. Input your login information. This information is located on the blue GLBB Customer Information Sheet which was given to you during the initial signup.

Once the information is inputted, press the "Connect" button below.

7. Your computer will now attempt to login to the internet.

When the connection is made, the message "The connection to the Internet is ready to use" will display.
You can now open your browser of choice and start browsing the internet.
