

★**IMPORTANT ALL ADSL USERS** Please USE Only 1 Phone Jack in your residence,Just having phones plugged into jacks causes line noise, which will interfere with your ADSL signal.

Also use phone lines that are as short as possible. The LAN cable,however,can be up to 100 meters.

***Make sure you use the Shortest Cable to connect the Line Port to the Phone Jack.

Set-Up Your PC

- ① Make sure your computer is turned on and Open Internet Explorer. Press Cancel or close to any messages that pop up asking you to go online. Go to Tools from the Top Menu and Click Internet Options. Click "Connection" Tab.
- ② Put a check on "Never dial a connection"
