

Set up Internet Connection of FLET'S Hikari Next

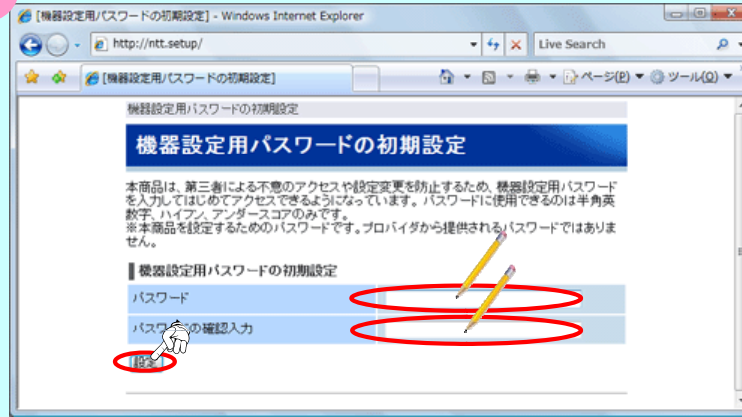

* Windows Vista screen images

1 Connect your computer to a LAN port on the NTT router

Start up the browser and input the following URL.
https://ntt.setup/

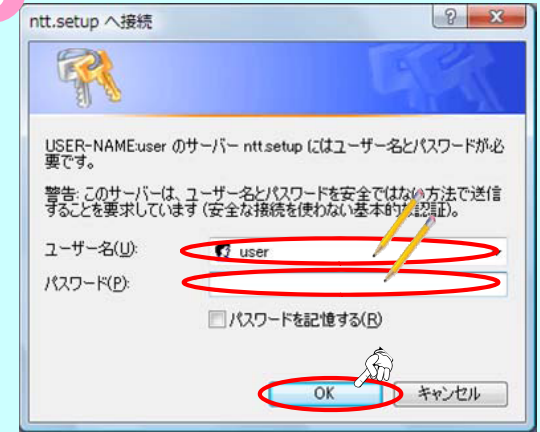

2

Set a password for the router, enter twice.

- [1] Input arbitrary character string (up to 64 alphanumeric characters) into "パスワード:Password".
- [2] Input the same character string as above [1] into "パスワードの確認入力:Password Confirmation".
- [3] When you completed the input, click "設定:Setup".

3

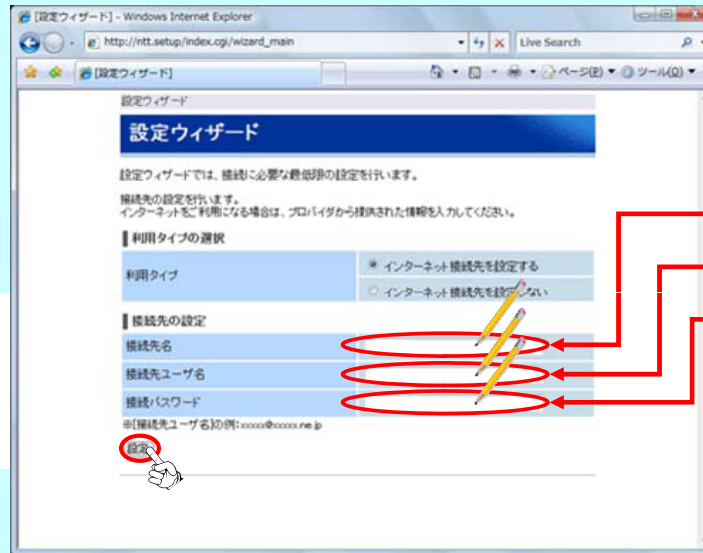

When the above screen appears, input the following and then click "OK":

- [1] Input "user" into "ユーザ名:User Name".
 - [2] Input the password set in 2 into "パスワード:Password".
- (If the screen doesn't appear, go to 4.)

4

- Input 「接続先名:Connection Name」.
※ Usually input your provider name, but you can input a name you want.
- Input 「接続ユーザ名:name@nextf.glbb.ne.jp」 and 「接続パスワード: login paswword from GLBB」
- When you completed the input, click "設定:Setup".

<Document sent from your provider (Example)>

お客様情報 (ご契約内容) [Customer information (Contract details)]	
プロバイダ名 [Provider name]	GLBB
接続ユーザ名 [Connection user name]	abcd1234@nextf.glbb.ne.jp
接続パスワード [Connection password]	*****

Click "OK".

Attention Item names are different depending on the provider:

Possible examples of connection user name	Possible examples of connection password
<ul style="list-style-type: none"> ■ 認証ID ■ ユーザID ■ ログインID ■ (プロバイダ名) ID など 	<ul style="list-style-type: none"> ■ 認証パスワード ■ パスワード ■ 接続パスワード ■ ログインパスワード ■ ネットワークパスワード など

例: taro@xxx.xxx.xxx

This completes the Internet Connection Setup.
